# Introduction

# Domination of Music Listening Habits Over Time

Since 1990, the way people interact with music has evolved significantly. This period marks a transition from the tangible, physical media of CDs and vinyl to the intangible, yet infinitely accessible world of digital music.

- How digitalization and streaming have influenced listeners?
- How the listening habits have changed over time?

We'll examine how our music listening habits have been affected from duration of the songs to the way sentiment of the lyrics.

---

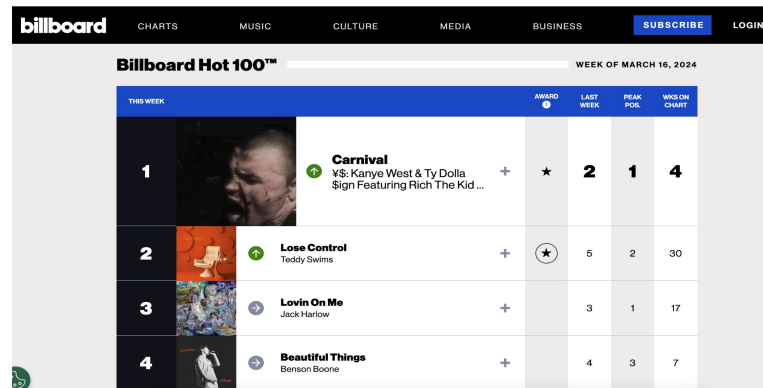

# Methodology

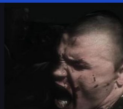

# Methodology (Data Collection)

## Music Samples

Used BeautifulSoup to scrape and collect the most popular songs from every week from January 1990 to February 2024.

Collected 14000+ unique songs and artists from Billboard Hot 100 Charts.

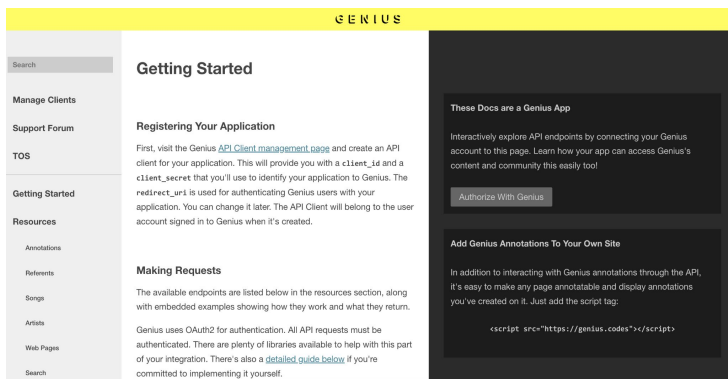

billboard		CHARTS	MUSIC	CULTURE	MEDIA	BUSINESS	SUBSCRIBE	LOGIN

# Methodology (Data Collection) - 2

## Collecting Lyrics

Used [LyricsGenius](#), a Python wrapper of the Genius.com API to collect the lyrics from the Billboard Hot 100 songs.

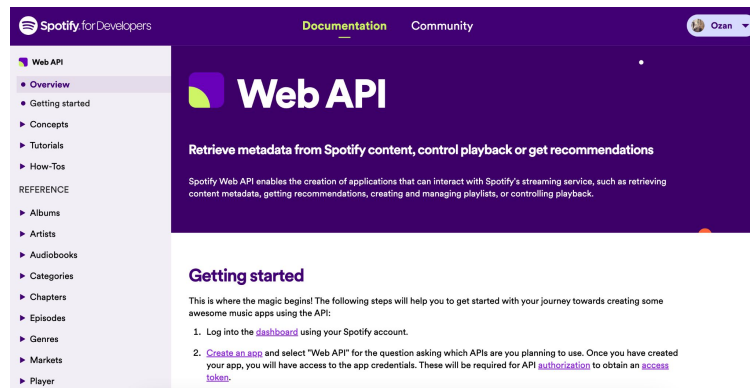

Collected 12000+ unique song lyrics.

API Source: [Genius API](#)

# Methodology (Data Collection) - 3

## Audio & Track Features

Used [Spotipy](#), a Python wrapper for the Spotify API to collect additional audio and track information from Billboard Hot 100 songs

API Source: [Spotify API](#)

# Methodology (Data Cleaning)

## Issues with Genius API Lyrics - Translation

Used [langdetect](#) for language detection

Used [deep translator](#) for translation

# Methodology (Data Cleaning)

## Issues with Genius API Lyrics - Unrelated Lyrics

**Artist Name:** Farruko, Nicki Minaj, Bad  
Bunny, 21 Savage & Rvssian

**Song Name:** Krippy Kush

**Lyrics:** 4 Contributors Spanglish Songs - List of songs in English and Spanish / Lista de canciones en español e inglés Lyrics • "#Freetag" by Kidd Keo • "1, 2, 3" by Sofia Reyes ft. Jason Derulo & De La Ghetto • "1-800-273-8255 (Remix)" by Logic & Juanes ft. Alessia Cara & Khalid • "24" by Duki & Kidd Keo • "Adrenalina (Spanglish Version)" by Ricky Martin ft. Jennifer Lopez & Wisin • "A.N.A." by Kidd Keo • "Aquí Yo Mando" by Kali Uchis & Rico Nasty • "Arms Around You" by XXXTENTACION & Lil Pump ft. Maluma & Swae Lee • "AWAKE\_001" by Kidd Keo • "Ayy Macarena" by Tyga & Ozuna • "Back It Up" by Prince Royce ft. Jennifer Lopez & Pitbull • "Back to the Future" by Kidd Keo ft. MAD BASS • "Back to the Future II" by Kidd Keo • "Bailando" by Enrique Iglesias ft. Sean Paul, Gente De Zona & Descemer Bueno • "Baller" by Kidd Keo • "Bando Boyz Free" by Kidd Keo • "Bando Girl" by Kidd Keo • "Barcelona" by Ed Sheeran • "Barefoot in the Park" by James Blake ft. ROSALÍA • "Beautiful Liar (Spanglish Version)" by Beyoncé • "Better Days" by OneRepublic & KHEA • "Bigger Love (Remix)" John Legend ft. Mau & Ricky • "BOUNCE" by Kidd Keo • "Box Boy" by Berner ft. Pablo Chill-E • "BRRUM FAST & FURIOUS" by Kidd Keo • "Buscando" by Yung Sarria & Kidd Keo • "Calypso" by Luis Fonsi ft. Stefflon Don • "Can't Tell Me Nada" by Alemán ft. Chucho Ortega, Cozy Cuz & Schmidt • "Caress Me Down" by Sublime • "CELEBRATE" by Black Eyed Peas • "Chapa" by Kidd Keo ft. MAD BASS & Elegvngster • "Chica Me Tipo" by Sublime • "Colors" by Jason Derulo & Maluma • "Con Calma (Remix)" by Daddy Yankee & Katy Perry • "Contra la Pared" by Sean

# Methodology (Data Cleaning)

## Text Preprocessing

- Selecting english lyrics.
- Removing song title part in the lyrics.
- Removing numbers or special characters.
- Removing stopwords.
- Extracting only chorus parts in the songs for topic modeling part.
- Chunking to obtain the appropriate sequence length to the pretrained sentence embeddings model.
- Applying average pooling for the lyrics which having more than 1 chunk.
- Filtering to remove the outliers by taking the lyrics between the 5th and 95th quantile based on their sentence length.

---

# Sentiment Analysis

# Two Aspects of Sentiment in Music

## Tonal Sentiment

- Spotify measures the tonal sentiment of the track through a metric they call *valence*.

*“A measure from 0.0 to 1.0 describing the musical positiveness conveyed by a track. Tracks with high valence sound more positive (e.g. happy, cheerful, euphoric), while tracks with low valence sound more negative (e.g. sad, depressed, angry)”* (Spotify, n.d.)

## Lyrical Sentiment

- We generated the lyrical sentiment by applying TweetNLP to the lyrics of each song on the Billboard Hot 100.

Label: {neutral, positive, negative}

Probabilities for each sentiment (neutral, positive, negative)

# Music is becoming progressively sadder over time

	p-value	Test Statistic	Critical Value (5%)
ADF	0.0000	-55.2960	-2.8616
KPSS	0.0100	14.3195	0.4630

The yearly time-series  
is trend stationary

# Seasonality in Musical Mood

Happier songs tend to become more popular around the end of Spring to the middle of Autumn

	p-value	Test Statistic	Critical Value (5%)
ADF	0.0000	-55.2960	-2.8616
KPSS	0.0100	14.3195	0.4630

The monthly time-series is difference stationary

# Lyrical Sentiment is not indicative of Musical Mood

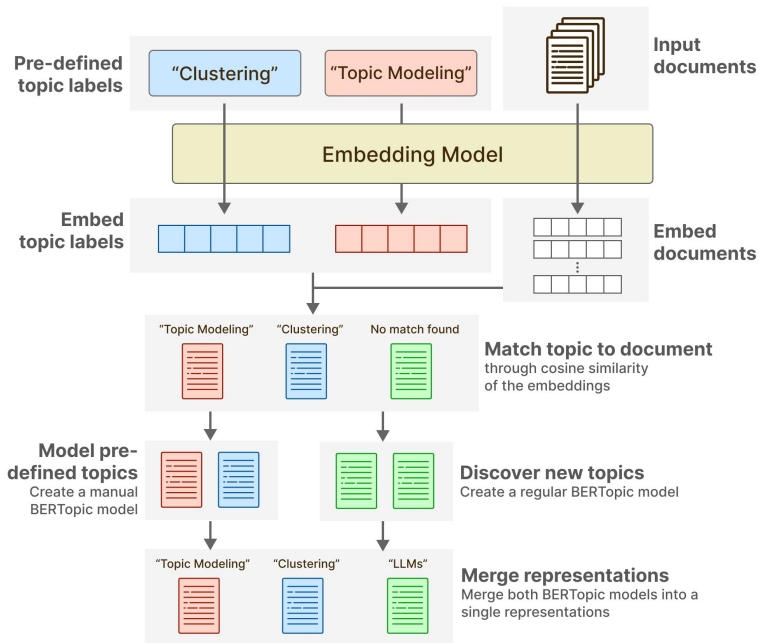

---

# Topic Modeling

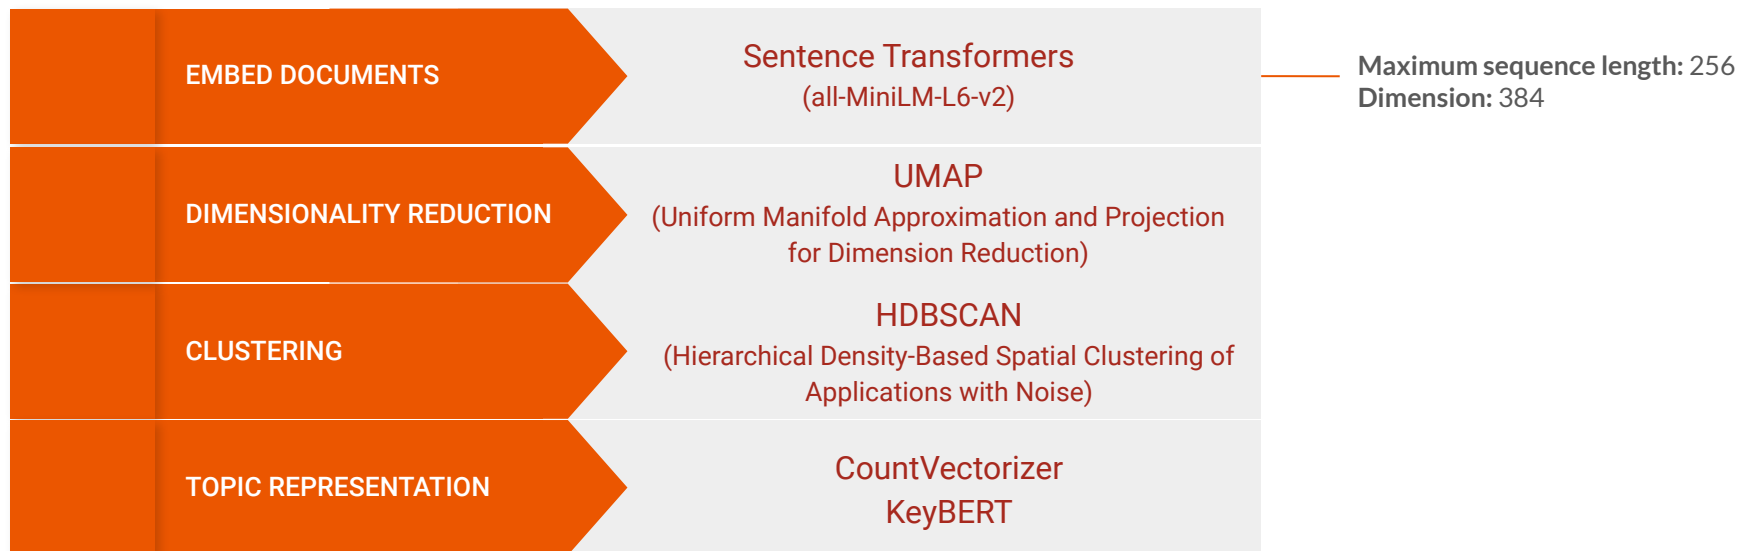

# Logic Behind BERTopic Technique

Source: [BERTopic: What Is So Special About v0.16?](#)

# Steps of Topic Modeling

Used songs' choruses in topic modeling.

# Coherence Score for Optimization

Coherence metric evaluates documents similarity based on semantic similarity and co-occurrence in assigned topics. Coherence score ranges between 0 and 1 (Higher is better). In addition, human-evaluation is also recommended.

Number of topics parameter in BERTopic is crucial for topic modeling performance.

# Hardness of interpretation of topics in the topic model

Used ChatGPT 4 to find appropriate topic names to handle this issue.

Topic	Count	Name	Representation	Representative_Docs
-1	4605	-1_nigga_niggas_baby_wanna	[nigga', 'niggas', 'baby', 'wanna', 'ain', 'stay', 'girl', 'talk', 'bout', 'night']	[girl you know i can provide yeah you can get whatever you want whatever you need i m givin you whatever you want but i got you open now so i m bout to show you now finally got a rich nigga baby you made it we ain t f

# Prompt Engineering

# Prompt Template

Your role: You are an expert Customer Service Lead with 30 years of experience in customer service. Your wisdom is coming from your unique experience. You are the best about extracting useful insights from the data and also detecting the main theme in the data.

ROLE

Your task: I am sharing a `csv` file with you attached. This file contains several information about songs which is clustered. It has a column that is called 'Representation'. In this column there are a lot of keywords. These keywords represents the most frequent words of the song lyrics in each clusters. Your task is to find the most comprehensive, meaningful and appropriate cluster name based on the keywords in each row. Each row MUST represent one unique cluster name. You MUST NOT use the same cluster name. You SHOULD create 17 different cluster names. The cluster names SHOULD contain maximum 3 words.

TASK

The steps you must follow:

1. Examine the "Representation" column to understand the context and grouping of keywords.
2. If you need to understand more about the concept of each cluster, you can also examine 'Representative\_Docs' column to find a better cluster name.
3. After examining and understanding these keywords you SHOULD think about what topic might be appropriate for this cluster to represent it best.
4. You MUST be sure that you don't give the same cluster name to any other clusters.
5. The cluster name that you create MUST relate with the lyrics not the music style.
6. You just need to focus on what the lyrics are about.
7. If the lyrics contain explicit, racist or pornographic words you can create a cluster name using prefix as explicit, racist or pornographic.
8. You SHOULD be sure to follow all these steps above before giving a response.

STEPS

Output format: Share them with me as a spreadsheet by adding a new column at the end of existing file. The column name should be 'Topic Name'.

RESPONSE FORMAT

# Topic Descriptions Assigned by ChatGPT 4

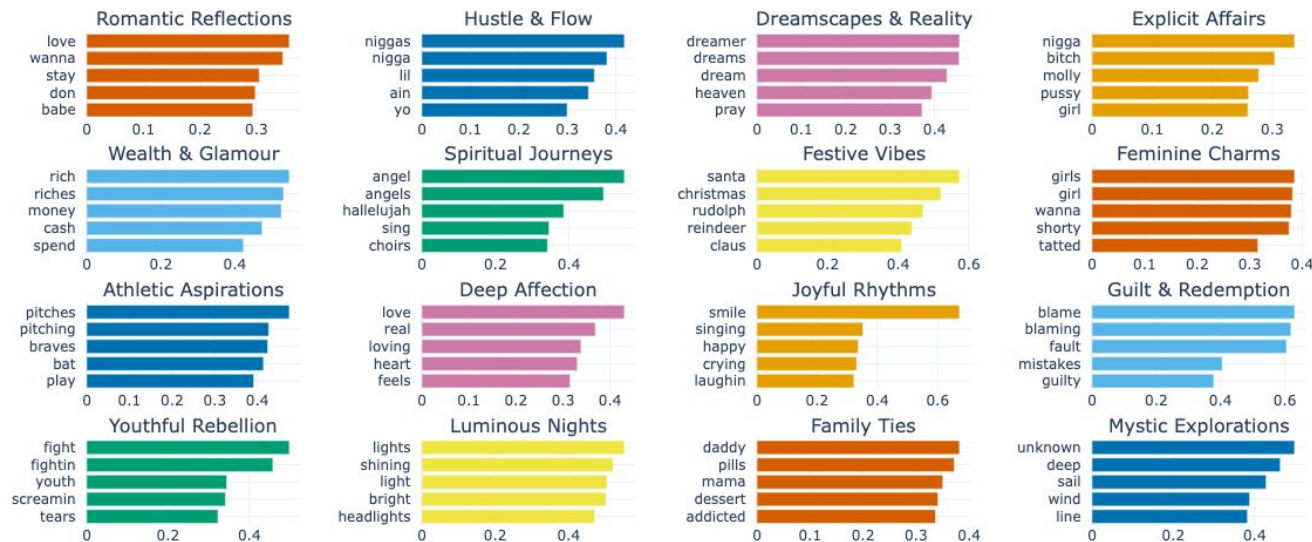

ChatGPT 4 ▾

1. **Urban Tales** - Reflecting street narratives and personal struggles.
2. **Romantic Reflections** - Focused on love, relationships, and emotional dilemmas.
3. **Hustle & Flow** - Highlighting ambition, street life, and the grind.
4. **Dreamscapes & Reality** - About aspirations, dreams, and the pursuit of happiness.
5. **Explicit Affairs** - Contains explicit content related to personal relationships and experiences.
6. **Wealth & Glamour** - Centered around themes of wealth, luxury, and the high life.
7. **Spiritual Journeys** - Touching on themes of faith, spirituality, and the metaphysical.
8. **Festive Vibes** - Dedicated to holiday celebrations and festive occasions.
9. **Feminine Charms** - Discussing relationships, admiration, and experiences with women.
10. **Athletic Aspirations** - Reflecting on sports, competition, and personal achievements.
11. **Deep Affection** - Delving into profound love, heartfelt emotions, and intimacy.
12. **Joyful Rhythms** - Celebrating happiness, joy, and the brighter side of life.
13. **Guilt & Redemption** - Addressing feelings of blame, guilt, and seeking forgiveness.
14. **Youthful Rebellion** - Capturing themes of youth, rebellion, and the fight for ideals.
15. **Luminous Nights** - Evoking imagery of lights, nightlife, and vibrant energy.
16. **Family Ties** - Exploring family relationships, challenges, and deep bonds.
17. **Mystic Explorations** - Invoking themes of mystery, exploration, and the unknown.

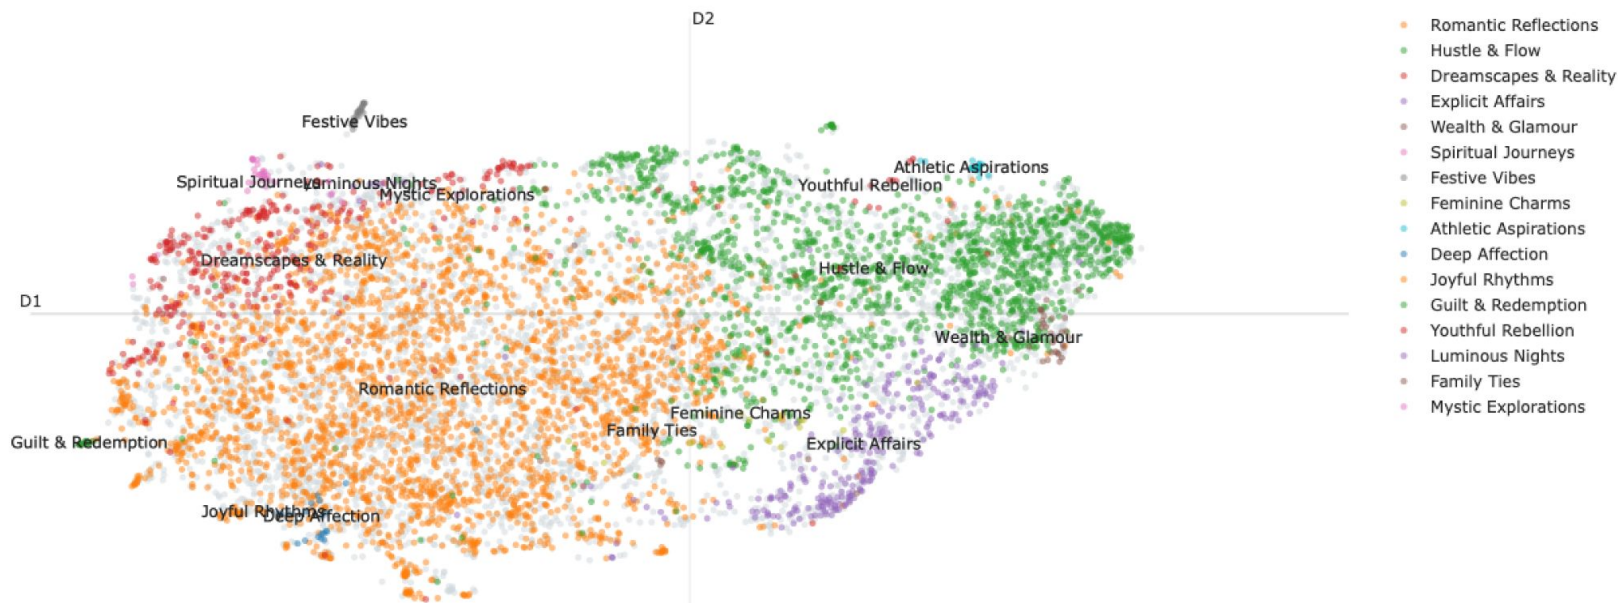

# The Most Frequent Words Per Topic

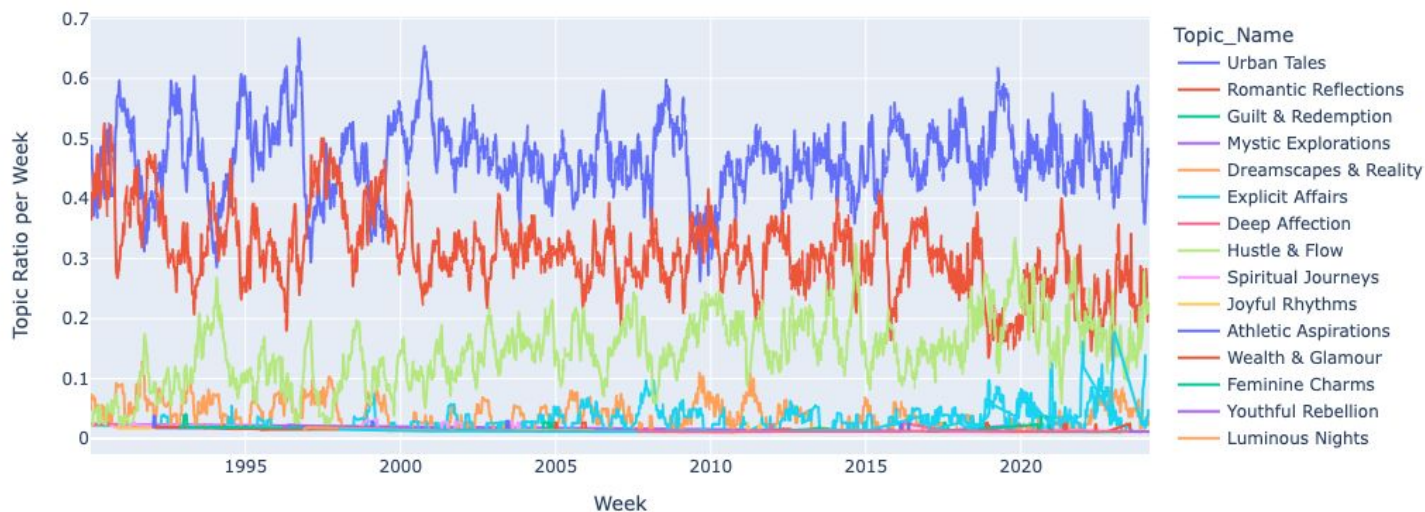

Topic Word Scores

# Topic Clusters

While romanticism is decreasing, aggression is increasing in choruses over time

---

# Additional Analysis

# Songs are getting shorter over time

	p-value	Test Statistic	Critical Value (5%)
ADF	0.0000	-24.7878	-2.8616
KPSS	0.0100	53.7981	0.4630

The yearly time-series  
is trend stationary

# Songs are getting shorter over time

---

# Conclusion

## Conclusion

1. Overall Music is becoming more somber in its tonal qualities
2. People's preference towards romantic lyrics and music is decreasing, while currently people prefer more aggressive and vulgar lyrics
3. There is an evident trend that shorter tracks are becoming more popular
